

Rathish Gandhi

Senior UX/UI Designer | Enterprise SaaS, Aviation & Telecom | 9+ Years

Bangalore, India (open to relocation) | +91 99443 88814 | rathishuid@gmail.com | rathishux.github.io/Rathish.UX | linkedin.com/in/rathish-gandhi

Senior UX/UI designer with **9+ years** spent on the complicated end of software — airline scheduling, telecom sourcing, clinical records, analytics. I take workflows people currently survive rather than use, and make them legible. Recently designed and shipped my own product end to end using AI tooling.

SELECTED PROJECTS

NivYou — GLP-1 Tracker

Designer and Developer | Dec 2025 to Present

An Android app for people on GLP-1 medication to log dose, weight, glucose and food, and watch the trend over time. Designed and built end to end — interface, backend, integrations and the Play Store release. In closed testing ahead of launch.

SlashDR — Digital Health Records

Product Design | Healthcare, India

Unified health interface apps giving Indian clinics and patients one place for digital health records.

SKILLS

Design and Prototyping

Figma, FigJam, Adobe XD, Wireframing, Prototyping, Interaction Design, Design Systems, Information Architecture, design to code handoff

AI and Agentic Workflows

Claude, Claude Code, Figma MCP, Cursor, GitHub, Vercel, Higgsfield, AI assisted product build

Research and Methods

UX Research, Usability Testing, Personas, Journey Mapping, Stakeholder Workshops, Data-Driven Design, Enterprise SaaS, Agile / Scrum

EDUCATION

College of Engineering

M.Sc, Electronic Media

CERTIFICATIONS

Design System Bootcamp — Molly Hellmuth

Design for Complex Problems — RISD

Adobe XD Essentials

EXPERIENCE

Senior UX Designer

Infogain — Sabre

Mar 2025 to Dec 2025 · Aviation, Enterprise SaaS · India

- Redesigned Sabre's airline scheduling suite, rebuilding **06+ core flows** and moving **90%** of a legacy desktop product to the web across **2 versions released to clients**.
- Turned reactive scheduling alerts into resolvable workflows, so planners could act on a conflict in place instead of tracking it somewhere else.
- Designed the admin side: configurable booking rules and market-driven demand insights, plus bulk edit and filtering that cut manual error in slot allocation.

UX Designer

Kipi.bi — Kipi 360

Jan 2024 to Oct 2024 · Data and Analytics, SaaS · India

- Designed Kipi 360, an analytics dashboard tracking account health, use-case pipelines and employee activity in one place, turning scattered metrics into same-day decisions.
- Reduced cognitive load on dense reporting screens by resolving complex data workflows into a small set of repeatable UI patterns.

Senior UX Designer

Ericsson Global — Lighthouse

Nov 2021 to Jan 2024 · Telecom, Sourcing and Sales · India

- Led UX for the Lighthouse Sourcing Pricebook, saving **\$20K+ in subscription costs** and cutting **60% of the time** to complete a sourcing task.
- Ran **2 stakeholder workshops** that set the scope of the rebuild, and mapped the source-to-agreement journey to show where it actually broke.
- Shipped supplier comparison, search and filtering, and price history, so buyers could read a trend rather than guess at one.

UX Designer

Infosys Limited — FinLocker

May 2019 to Aug 2021 · FinTech, Supply Chain · India

- Designed FinLocker, a financial fitness app helping consumers build credit and get mortgage-ready.
- Built enterprise SaaS workflows across fintech and supply chain systems, with high-fidelity prototypes that cut development rework at handoff.

UX Designer

NFN Labs — TAC Healthcare

Aug 2015 to Feb 2019 · Healthcare, SaaS · India

- Designed TAC Healthcare's EHR platform and shipped the **first version of the patient flow**, supporting **100+ new clinics onboarded** and a **10% engagement lift**.
- Covered appointments and booking, patient records, clinical notes, and admin and access control — an intuitive EHR built for everyday clinical work rather than for demos.
