

Rathish Gandhi

Senior UX/UI Designer | Enterprise SaaS, Aviation & Telecom | 9+ Years

Bangalore, India (open to relocation) | +91 99443 88814 | rathishuid@gmail.com | rathishux.github.io/Rathish.UX | linkedin.com/in/rathish-gandhi

SELECTED PROJECTS

NivYou

GLP-1 tracker · Designed and built solo

A personal product taken from idea to store listing — interface, backend, integrations and release. In closed testing ahead of launch.

Sabre Schedule Manager

Aviation · Enterprise SaaS

Planning tooling for airline schedulers, where a single slot decision ripples across markets, aircraft and crew.

Light-House Pricebook

Telecom · Sourcing and procurement

Buyer-side procurement tooling built so a supplier decision rests on evidence rather than on whoever quoted last.

SKILLS

Design and Prototyping

Figma, FigJam, Adobe XD, Wireframing, Prototyping, Interaction Design, Design Systems, Information Architecture, design to code handoff

AI and Agentic Workflows

Claude, Claude Code, Figma MCP, Cursor, GitHub, Vercel, Higgsfield, AI assisted product build

Research and Methods

UX Research, Usability Testing, Personas, Journey Mapping, Stakeholder Workshops, Data-Driven Design, Enterprise SaaS, Agile / Scrum

EDUCATION

College of Engineering

M.Sc, Electronic Media

CERTIFICATIONS

Design System Bootcamp — Molly Hellmuth

Design for Complex Problems — RISD

Adobe XD Essentials

EXPERIENCE

Senior UX Designer

Infogain

Mar 2025 to Dec 2025 · Aviation, Enterprise SaaS · India

- Redesigned Sabre's airline scheduling suite, rebuilding **06+ core flows** and moving **90%** of a legacy desktop product to the web across **2 versions released to clients**.
- Turned reactive scheduling alerts into resolvable workflows, and designed the admin side — configurable booking rules and market-driven demand insights — with bulk edit and filtering that cut manual error in slot allocation.
- Designed for a Novo Nordisk pilot digitalising diabetes treatment, shaping a clinical care pathway into something patients and their care teams could follow day to day.

Key projects: Sabre Schedule Manager, Booking Rules Engine, Market Analysis, Novo Nordisk diabetes pilot

UX Designer

Kipi.bi

Jan 2024 to Oct 2024 · Data and Analytics, Healthcare · India

- Designed Kipi 360, an analytics dashboard tracking account health, use-case pipelines and employee activity in one place, turning scattered metrics into same-day decisions.
- Designed TAC Healthcare's EHR — appointments and booking, patient records, clinical notes, and admin and access control — built for everyday clinical work rather than for demos.

Key projects: Kipi 360, TAC Healthcare (EHR)

Senior UX Designer

Ericsson Global

Nov 2021 to Jan 2024 · Telecom, Sourcing and Sales · India

- Led UX for the Light-House Sourcing Pricebook, saving **\$20K+ in subscription costs** and cutting **60% of the time** to complete a sourcing task, with supplier comparison and price history in place of guesswork.
- Moved PiWeb, Ericsson's internal database and data-management tool, from legacy desktop to cloud — the site-data repository project managers work from during a network rollout, and the workflow teams use to verify equipment data.
- Ran **2 stakeholder workshops** that set the scope of the rebuild, and mapped the source-to-agreement journey to show where it actually broke.

Key projects: Light-House (sourcing), Data Analytics Platform, PiWeb

UX Designer

Infosys Limited

May 2019 to Aug 2021 · FinTech, Supply Chain · India

- Led design of complex transaction workflows for enterprise and SaaS products, with high-fidelity wireframes and interactive prototypes that cut development rework at handoff.
- Built and maintained a design system for Apple's Supply Chain, holding consistency across platforms as the work scaled.

Key projects: Apple Supply Chain, FinLocker (SaaS fintech), AM Bank

UX/UI Designer

NFN Labs

Aug 2015 to Feb 2019 · Healthcare, SaaS, Consumer · India

- Designed interfaces for in-house and client products across several domains, carrying each from ideation through delivery.
- Shipped the **first version of the SlashDR patient flow**, supporting **100+ new clinics onboarded** and a **10% engagement lift**, working with developers through implementation so what shipped matched what was designed.

Key projects: Hasura, Huetrap, SlashDR (EHR)
